

Abstract

A pharmaceutical preparation comprising:

- 5 (a) an active substance comprising a tiotropium salt, in a concentration based on
 tiotropium of between 0.0005 and 5% by weight;
- (b) a solvent selected from water or a water/ethanol mixture;
- 10 (c) acid for achieving a pH between 2.0 and 4.5; and
- (d) a pharmacologically acceptable preservative,

optionally including a pharmacologically acceptable complexing agent, stabilizer, a
15 pharmacologically acceptable cosolvent, or other pharmacologically acceptable adjuvants
and additives; a method for administering a pharmaceutical preparation by nebulizing the
pharmaceutical preparation in an inhaler, and a method of treating asthma or COPD in a
patient using the pharmaceutical preparation.
